

## List of Contents

### NUMBER 1

<b>Variable structure slewing control and vibration damping of flexible spacecraft</b>	1
Ashok Iyer and Sahjendra N. Singh	
<b>The Hermes system: programme status and technology aspects</b>	11
M. Delahais and M. Nerault	
<b>Assessment of crew operations during internal servicing of the Columbus Free-Flyer by Hermes</b>	23
F. Winisdoerffer, A. Lamothe and J. C. Bourdeau'hui	
<b>A new radar system for the French program in the 2000s</b>	43
J. P. Aguttes, D. Massonnet and O. Grosjean	
<b>Telecommunications technology development for the Deep Space Network</b>	51
J. H. Yuen, G. M. Resch and C. T. Stelzried	

### NUMBER 2

<b>Stability of a tethered satellite subjected to stochastic forces</b>	61
Guido de Matteis and Luciano M. de Socio	
<b>A closed-form dynamical analysis of an orbiting flexible manipulator</b>	67
J. K. Chan and V. J. Modi	
<b>A novel autonomous orbit determination system using Earth sensors (scanner)</b>	77
N. Nagarajan, M. Seetharama Bhat and K. Kasturirangan	
<b>Safety in the geostationary orbit after 1988</b>	85
Luboš Perek	
<b>SPOT HRVIR: a significant improvement of high resolution visible SPOT camera to i.r. wavelengths</b>	89
J. Jouan, J. F. Reulet and G. Costes	
<b>Compressibility effects during crystal growth from the vapour phase</b>	97
C. Mignon and B. Zappoli	
<b>NASA spinoffs to bioengineering and medicine</b>	103
Doris J. Rouse, Daniel L. Winfield and S. Catherine Canada	
<b>Effect of fluid and salt supplements in preventing the development of "osteopenia" in hypokinetic rats</b>	111
Y. G. Zorbas, Y. F. Federenko and M. N. Togawa	
<b>EX MUNDO ASTRONAUTICO</b>	
<b>List of Reviewers</b>	117

### NUMBER 3

<b>An explicit closed-loop guidance for launch vehicles</b>	R. Vijaya Vittal and M. Seetharama Bhat	119
<b>Real solutions for the attitude motion of a self-excited rigid body</b>	James Michael Longuski	131
<b>Optimal large angle maneuvers of a flexible spacecraft</b>	Peter M. Bainum and Feiyue Li	141
<b>Dynamics of the Space Station based mobile flexible manipulator</b>	V. J. Modi and J. K. Chan	149
<b>Simulation of solar array slewing of Indian Remote Sensing Satellite</b>	P. K. Maharana and P. S. Goel	157
<b>A view toward future launch vehicles: a civil perspective</b>	C. R. Darwin, G. Austin, L. Varnado and G. Eudy	165

### NUMBER 4

<b>Three-dimensional LEO keeping using low-thrust</b>	Jeng-Shing Chern, Ching-Yew Yang and Chung-Chen Lai	177
<b>Design of attitude control system for injection of spinned payloads</b>	S. Chavy and F. Fantar	185
<b>Advances in space robotics</b>	Giulio Varsi	199
<b>Numerisches Charakteristikenverfahren zur Berechnung der Explosion</b>	Peter Wehle und Walter Gretler	209
<b>Radiatively cooled telescopes: a new direction for infrared space astronomy</b>	J. K. Davies, T. G. Hawarden and C. M. Mountain	223
<b>Satellite eclipse power by laser illumination</b>	Geoffrey A. Landis	229
<b>The provision of efficiency of the liquid metal evaporators in the space solar energy convertors</b>	V. F. Prisnyakov, Yu. D. Morozov, A. N. Privalov, Yu. K. Gontarev and S. A. Belogurov	235
<b>The basic health care system for the lunar base crew</b>	Minoru Terai and Keiji Nitta	239
<b>Germination and growth of wheat in simulated Martian atmospheres</b>	Steven H. Schwartzkopf and Rocco L. Mancinelli	245

## NUMBER 5/6

### *SPECIAL ISSUE* **LAUNCH SYSTEMS**

*A selection of papers presented at the  
40th Congress of the International Astronautical Federation  
Malaga, Spain, 7-13 October 1989*

<b>Foreword</b>	Malcolm G. Wolfe	249
<b>Development status of Japan's new launch vehicle: H-II rocket</b>	M. Miyazawa and Y. Fukushima	251
<b>The Delta II launch vehicle</b>	J. F. Meyers	265
<b>Continued enhancements to the Commercial Atlas Launch System</b>	Barry A. Matsumori and Greg Wong	273
<b>This is Commercial Titan Inc.</b>	F. L. Van Rensselaer, R. D. Slovikoski and T. C. Abels	291
<b>The case for the evolution of the Shuttle system</b>	Aaron Cohen	301
<b>Ariane 5: a mature development programme</b>	C. Johnson and J. F. Lieberherr	309
<b>United States Orbital Transfer Vehicle programs</b>	Charles R. Gunn	323
<b>IRIS system and future application to expendable launchers</b>	Luigi Bussolino, Franco Varesio, Giovanni Rum and Claudio Portelli	331
<b>The Advanced Launch System: application of Total Quality Management principles to low-cost space transportation system development</b>	M. G. Wolfe, T. G. Rothwell, D. A. Rosenberg and M. B. Oliver	339

## NUMBER 7

<b>Japanese first double lunar swingby mission "Hiten"</b>	K. Uesugi, H. Matsuo, J. Kawaguchi and T. Hayashi	347
<b>Experimental observation of the influence of furnace temperature profile on convection and segregation in the vertical Bridgman crystal growth technique</b>	G. T. Neugebauer and W. R. Wilcox	357
<b>Hypervelocity impact response of aluminum multi-wall structures</b>	William P. Schonberg and Alan J. Bean	363

<b>French "platform-related" technological experiments on-board Soviet Space Stations</b>	J. J. Runavot	375
<b>Remote sensing of mesospheric and thermospheric density perturbations induced by subtropical heavy rainfalls for spacecraft environment study</b>	R. J. Hung, C. C. Lee, D. L. Johnson and A. J. Chen	379
<b>The aimed satellite scanner imagery: results and progress</b>	N. V. Mezhelevsky Y., O. L. Kuznetsov, N. S. Ramm, A. K. Rynskaya, A. S. Selivanov, Ju. V. Trifonov, A. M. Volkov, V. V. Shvarjov and L. P. Yaroslavsky	395
<b>Navstar GPS and GLONASS: global satellite navigation systems</b>	P. Daly	399
<b>ETS-VI Multibeam Satellite Communications Systems</b>	Makoto Kawai, Masayoshi Tanaka and Isao Ohtomo	407
<b>Effect on the cardiac function of repeated LBNP during a 1-month head down tilt</b>	Ph. Arbeille, D. Lebouard, M. Massabuau, J. M. Pottier, F. Patat, L. Pourcelot and A. Guell	415

## NUMBER 8/9

### SPECIAL ISSUE

### SPACE FOR PEACE AND PROGRESS

*Selected papers presented at the  
41st Congress of the International Astronautical Federation  
Dresden, Fed. Rep. Germany, 8-12 October 1990*

<b>Data handling in telescience experiments using the Prototype Optical Diagnostic Instrument (PODI)</b>	E. A. Kuijpers and R. Born	419
<b>Unmanned servicing of Earth observation systems in sunsynchronous orbits</b>	Jack Sliney, Bill Robertson, Tom Misencik and Jeannie Lee	429
<b>Use of NOAA satellite data for grassland studies in Poland</b>	Zbigniew Bochenek	439
<b>Spectral characteristics of mixed classes of natural formations</b>	Dimitar Mishev	443
<b>Earth-Mars unmanned transportation systems</b>	Chun Dong and Zuwei Huang	447
<b>Optimization of a Cassegrainian collector/receiver system for solar-dynamic space power generation</b>	W. Zörner, W. Sedlmair and J. Blumenberg	449
<b>Optimal control of ascent trajectories and rotary dynamics for wingless orbital stages</b>	Gottfried Sachs, Johannes Drexler and Robert Stich	463

<b>An approach to system modes and dynamics of the evolving Space Station Freedom</b>	V. J. Modi, A. Ng and A. Suleman	473
<b>On-orbit control system performance of the ROSAT spacecraft</b>	M. Bollner	487
<b>DORIS (Doppler orbitography and radiopositioning integrated from space): system assessment results with DORIS on SPOT 2</b>	M. Dorrer, B. Laborde and P. Deschamps	497
<b>Ground-based experiments and theory in preparation for floating zone melting and directional solidification of cadmium telluride in space</b>	W. R. Wilcox, F. M. Carlson, D. K. Aidun, V. White, W. Rosch, W. M. Chang, R. Shetty, A. Fritz, R. Balasubramanian, G. Rosen, J. Kweeder and C. Wen	505
<b>Response of a solid-gas solidification interface to bulk heat sources</b>	Bernard Zappoli	511
<b>Slosh wave excitation in a partially filled rotating tank due to gravity jitters in a microgravity environment</b>	R. J. Hung, C. C. Lee and F. W. Leslie	523
<b>Numerical simulation of controlled directional solidification under microgravity conditions</b>	S. Holl, D. Roos and J. Wein	553
<b>Hipparcos on-orbit environment and performance</b>	G. Fade, M. le Moine and D. Pawlak	561
<b>Slant path rain attenuation distribution at frequencies above 10 GHz: correlation between some propagation models and results of long-term measurements in the Intercosmos Programme</b>	E. Alexandrova, W. Bauer, W. Liebsch, H. Trommer, V. Bykov, V. Svjatogor, O. Fisher and A. Kavetzki	579
<b>Changes in chromatin and nucleic acids in rat tissues after two-week spaceflight</b>	E. Mišúrová and K. Kropáčová	587
<b>Unmanned <i>in situ</i> experiment on lunar resources</b>	Tsutomu Iwata and Hideo Ohuchi	591
<b>Lunar base initiative 1992</b>	H. H. Koelle	595
<b>Analogy between training for dancers and problems of adjustment to microgravity: an evaluation of the subjective vertical in dancers</b>	Kitsou Dubois	605

## NUMBER 10

<b>Analysis of a solarthermal transfer propulsion system</b>	A. Daum and J. P. Schleinitz	615
<b>Mixed convection and solidification in a simplified metal pool of an ESR system</b>	Chun-Liang Lai and Kuo-Chang Chiou	625

<b>Telescience benefits and challenges in the early Space Station Freedom era</b>	
E. L. Saenger, G. M. Delaney and G. W. Maybee	641

<b>Various problems in lunar habitat construction scenarios</b>	
Keiji Nitta, Koji Ohtsubo, Mitsuo Oguchi, Haruhiko Ohya, Seiichiro Kanbe, Akira Ashida and Kenichi Sano	647

#### *ACADEMY TRANSACTIONS NOTES*

<b>Investigation of thermoconvective motion of liquid in enclosure by photochromic flow visualization</b>	
Yu. S. Ryazantsev and V. N. Yurechko	659

<b>Lunar He<sub>3</sub> for fusion energy on Earth?</b>	
Harry O. Ruppe	665

<b>SPS revisited</b>	
Harry O. Ruppe	667

### **NUMBER 11**

<b>Automated trajectory synthesis for hypersonic vehicles using energy management and variational calculus techniques</b>	
N. Venugopal, R. V. Grandhi, W. L. Hankey and P. J. Belcher	669

<b>Modeling and analysis of orbiting tethers in an atmosphere</b>	
Jordi Puig-Suari and James Michael Longuski	679

<b>Control issues of microgravity vibration isolation</b>	
C. R. Knospe, R. D. Hampton and P. E. Allaire	687

<b>Axial response of an amphora-type liquid column</b>	
H. F. Bauer and W. Eidel	699

<b>Space-based cryogenic liquid hydrogen reorientation activated by low frequency impulsive reverse thruster of geyser initiation</b>	
R. J. Hung and K. L. Shyu	709

<b>French Processing and Archiving Facility for ERS-1</b>	
M. Duplaa, P. Farcy and C. Billard	721

<b>Effect of hyperhydration on bone mineralization in physically healthy subjects after prolonged restriction of motor activity</b>	
Yan G. Zorbas, Youri F. Federenko and Konstantin A. Naexu	727

<b>Astronautics and psychology: recommendations for the psychological training of astronauts</b>	
Gerhard F. Haupt	733

### **NUMBER 12**

<b>Editorial</b>	737
------------------	-----

<b>Particle agglomeration and fuel decomposition in burning slurry droplets</b>	
P. Roy Choudhury and Melvin Gerstein	739

<b>Hypersonic flows over slender circular cones at small angles of attack</b>	Hamdi T. Hemdan	747
<b>Thermal resistance in satellite mounting plates due to conductive heat transfer</b>	Nellore S. Venkataraman and Daniel G. Sepulveda	757
<b>Space experiments of Deployable Boom and Umbrella Test satellite (DEBUT)</b>	A. Nakajima, M. Abe, Y. Nishio and H. Yahagi	765
<b>CROCODILE: an automated apparatus for organic crystal growth from solution</b>	F. Gonzalez, M. Cunisse and A. Perigaud	775
<b>A strategy to study regional hydrology and terrestrial ecosystem processes using satellite remote sensing, ground-based data and computer modeling</b>	C. Vörösmarty, A. Grace, B. Moore, B. Choudhury and C. J. Willmott	785
<b>An innovative approach for distributed and integrated resources planning for the Space Station Freedom</b>	Rhoda Shaller Hornstein, Gerald L. Shinkle, Jerry D. Weiler and John K. Willoughby	793
<b>Public school teachers in the U.S. evaluate the educational impact of student space experiments launched by expendable vehicles, aboard Skylab, and aboard Space Shuttle</b>	Bettye B. Burkhalter, James E. McLean, James P. Curtis and George S. James	799
